Announcement regarding conversion of large number  
of Class A Preferred Stock (with adjustment clause of conversion price)

Please be informed that as we have received a conversion request as of yesterday of a large number of our Class A Preferred Stock into common stock (exercise of a right by a holder of Class A Preferred Stock to request us to acquire the same in exchange of our common stock), we disclose the current status of conversion as described below.

For your information, Class A Preferred Stock, the initial issue price of which was JPY 70 per share, is given liquidation preference of JPY 77 per share, and (cumulative) preferred dividend of JPY1.75 per share per annum. Such liquidation preference and preferred dividend (including accumulated amount) shall expire upon conversion into common stock. While the amount of asset per common stock would adversely be affected by dilution due to the increased issued and outstanding common stock, the said expiration of liquidation preference and preferred dividend would contribute to improve the amount of asset per common stock.
